

Manufacturer Finds Savings After Installing Protect™

A commercial manufacturer with 23 companies to care for brought their 5,800 members to RxBenefits to reduce pharmacy benefit costs. After a couple of years of success with RxBenefits managing their plan, the group decided to add Protect™ to their design to protect their members from inappropriate medications and excess costs.

Unnecessary Spend Protection

When patients are prescribed low clinical value (LCV) drugs, RxBenefits’ formulary exclusions can protect a plan sponsor from wasting money while providing the member with a lower-cost, equally effective medication. For this commercial manufacturer, the impact of implementing these formulary changes was dramatic. In one year, their per-member-per-month costs dropped by \$3.71, producing \$258K in savings for the plan sponsor.

The Impact of Low Clinical Value Formulary Exclusions PMPM:

Year 1	Year 2
\$4.86	\$4.53
Year 3	Today
\$0.82	\$0.80

LCV formulary exclusion begins

A Close Eye On High-Dollar Claims

When a claim that exceeds \$1K for a 30-day supply is submitted, our High Dollar Claim Review automatically flags it for independent licensed expert clinical review. Our PharmDs review the chart notes, prescribing information, and our first-party data to make sure the high-dollar prescription is the best option for that patient. When this manufacturer group added this option to their plan, they saw an estimated \$320K in savings during the first year.

Driving Down PMPM Costs with HDCR:

Year 1	Year 2
\$9.76	\$8.75
Year 3	Today
\$4.15	\$3.60

HDCR begins

Not only did this commercial manufacturer provide a great benefit for members tied to their various companies, but they also found that these programs **protected their plan from wasted spending.**

And after years of proven results, they continue to increase their investment in pharmacy benefits by adding our Complex Condition Intervention to increase oversight and protection of their members with chronic, complex, and rare conditions.
