

# 340B Savings Helps Tribe Provide Healthcare to All

From unique patient and community relationships to different program structures, optimizing the pharmacy spend of tribal entities requires expert guidance.

## Midwestern Tribal Entity

**1600+** member lives & **\$3.2M** annual spend

**Mission:** To provide healthcare to all, regardless of their ability to pay

## Unwieldy 340B = Unrealized Opportunities

The Tribe began to use the federal drug discount program 340B to meet their mission, but soon realized the program is more complicated than they imagined. They needed an expert to show them how to manage their 340B vendor platform and identify opportunities for savings.

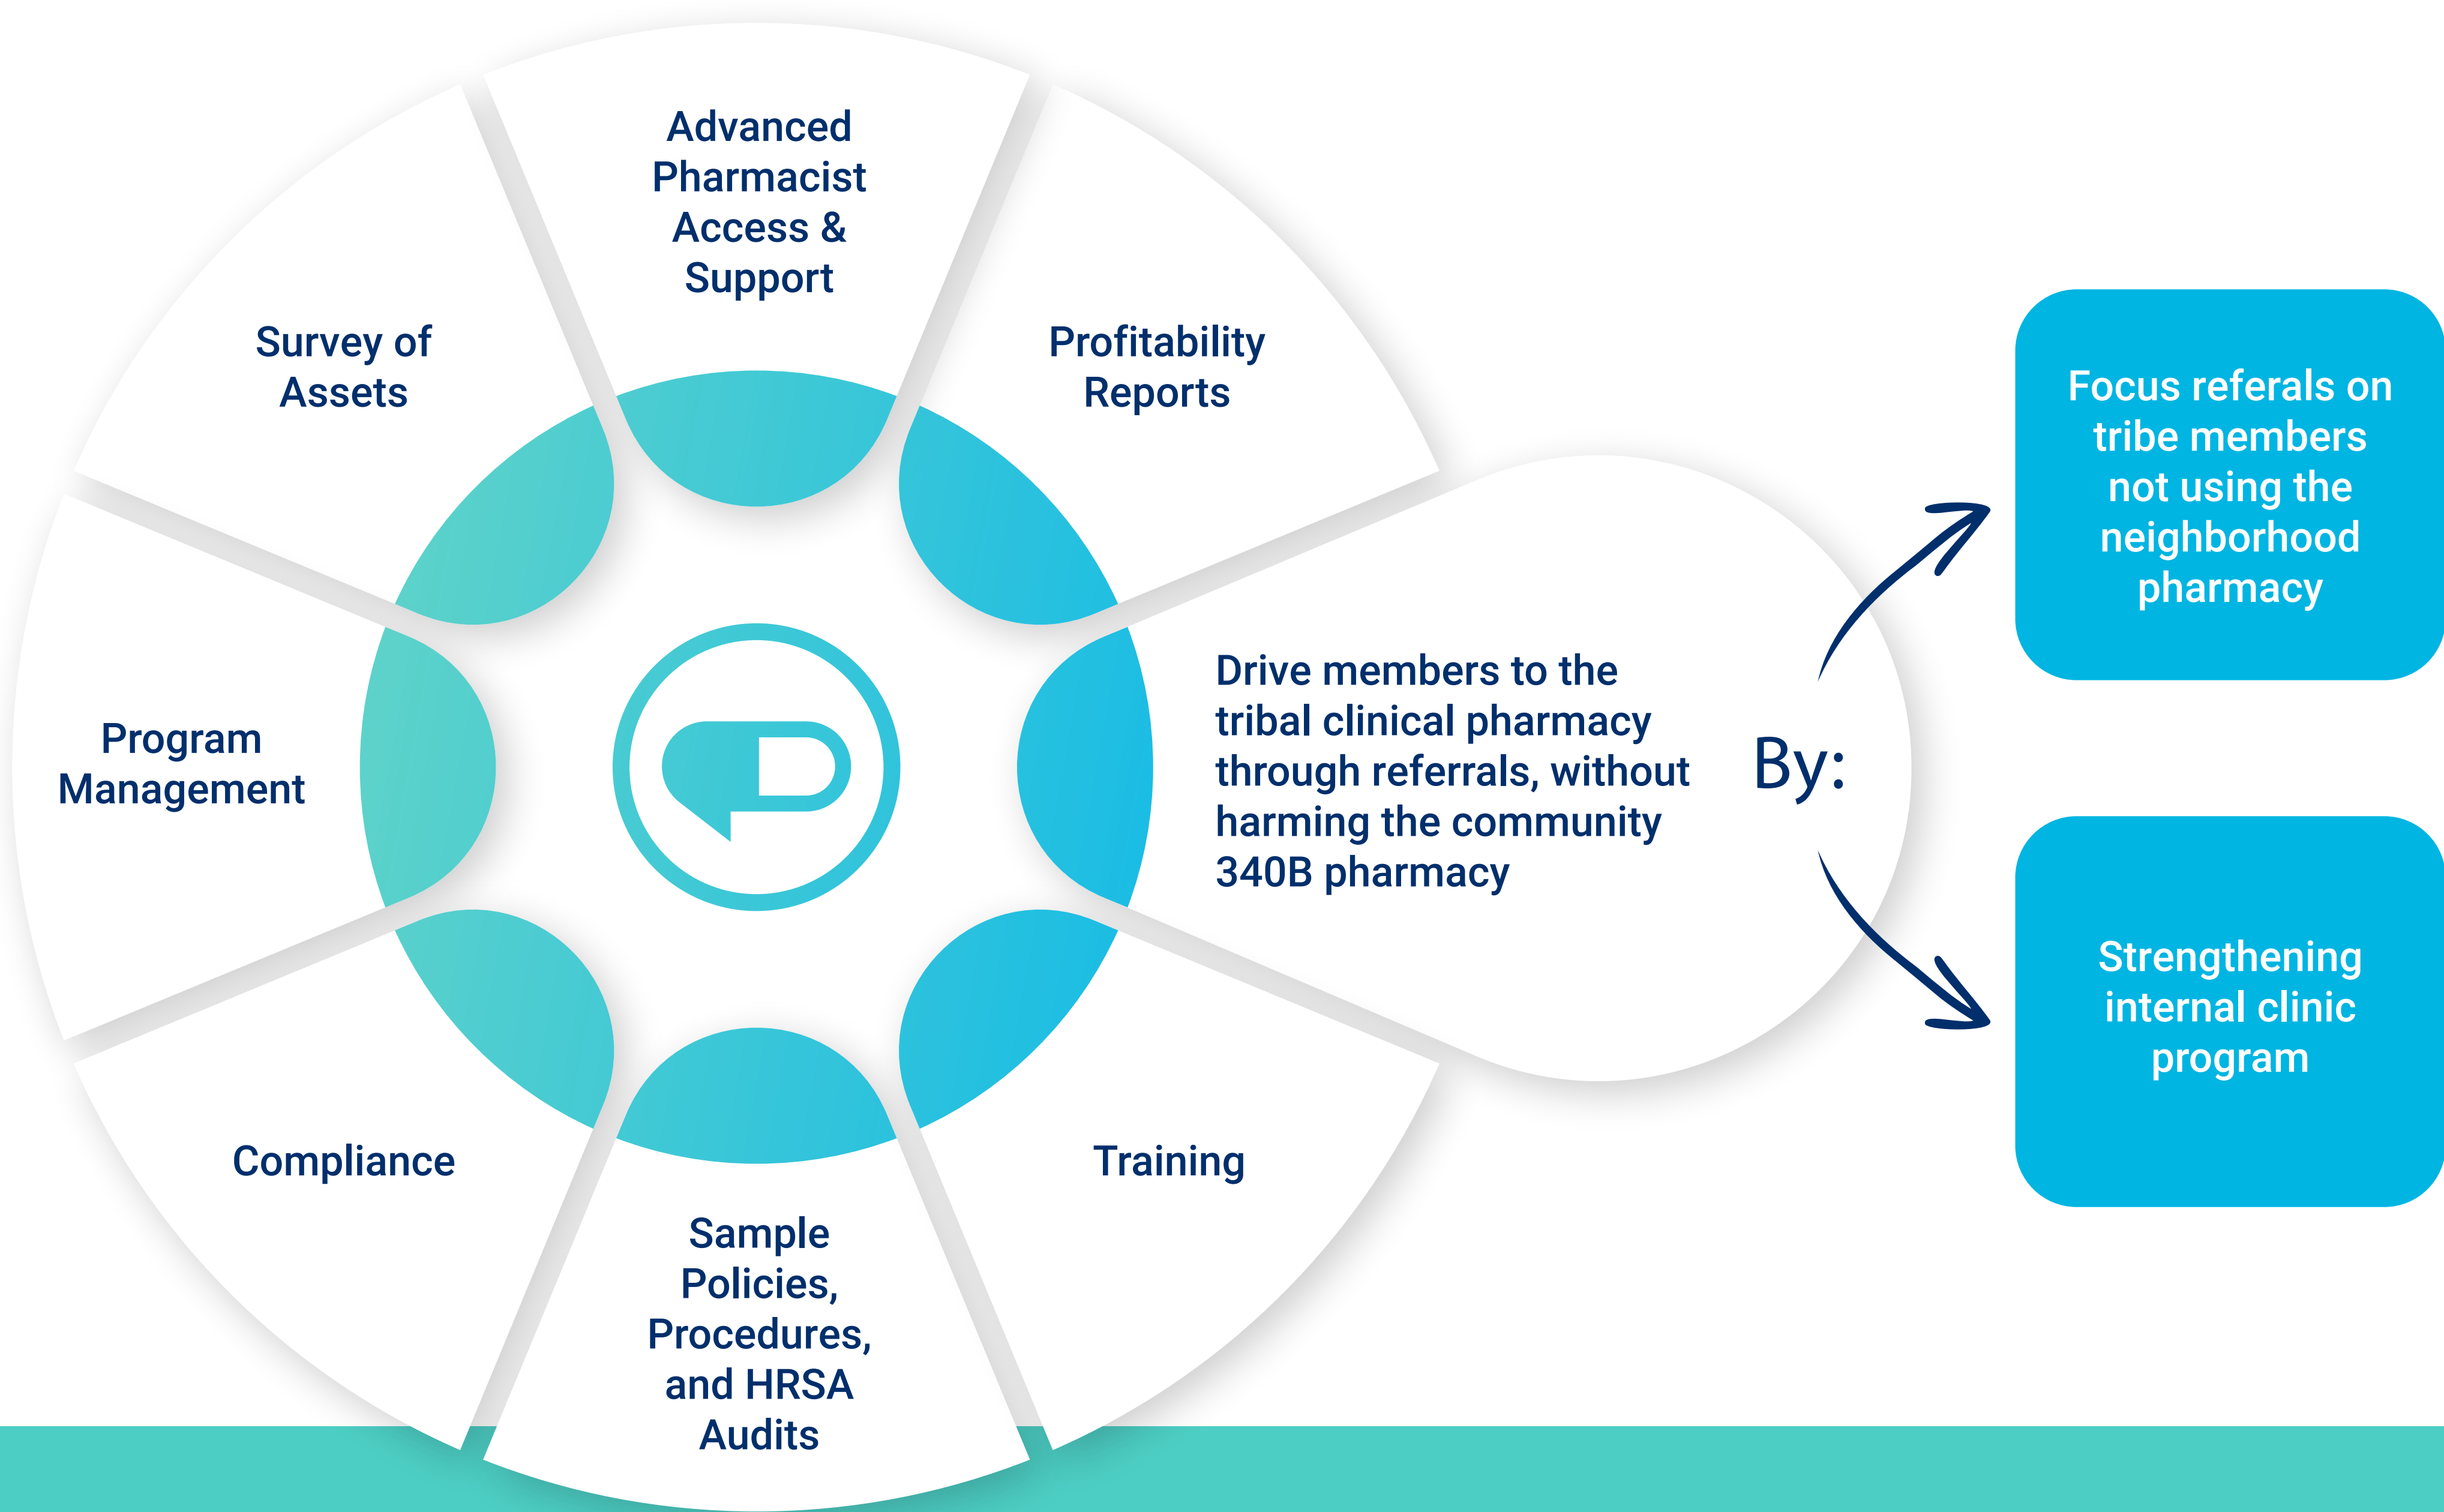

## What Happened?

Only utilizing 340B through a contract pharmacy relationship created issues when manufacturers placed restrictions on the program, thus reducing the tribe's savings.

## Expert Help to Identify Missed Opportunities

The tribe partnered with 340B experts at RxBenefits. The team reviewed the plan's past performance and identified ways for the tribe to achieve their objectives through referrals and find long-term service engagements to recapture lost savings.

## RxBenefits team develops a comprehensive plan

## Uncovered Opportunities

**>\$1.35M**

In-plan cost 340B referral opportunity

**\$850K**

In-plan cost eligible for 340B at entity-owned pharmacy

**\$510K**

Available plan cost not currently filled at 340B contract pharmacies

**\$880K**

Projected Net Savings

Take your 340B program to the next level.
